

USER MANUAL

**ELECTRONIC
VOLTAGE
STABILIZER**

Congratulations on owning a product that is not just thoughtfully designed, but also the most advanced in its category, without a doubt. Every stabilizer is inspected and tested thoroughly before leaving our premises. We undertake to repair this unit FREE OF CHARGE for a period of 36 months from the date of purchase, if any defect in material or workmanship occurs. This undertaking does not extend to any equipment for which the voltage stabilizer is connected.

| Model : VNS 400 PLUS | Capacity : 12 Ampere | Application: One Air Conditioner Up to 1.5 TON |
|----------------------|----------------------|---|

The most up-to-date design and manufacturing standards make this an ideal guard to your equipment from voltage fluctuations. This unit can withstand up to 320V AC input. Please ensure that excess voltage beyond this level is not fed to the stabilizer, which can cause serious damage to the stabilizer and connected equipment, in which case this warranty will have no application. This stabilizer is designed to work upto 50°C ambient temperature. Surge or spike protection is not provided in this stabilizer.

Please follow these simple instructions carefully:

Connect your equipment to the V-Guard stabilizer and connect the stabilizer to the mains. Do not cover the stabilizer with cloth or any other material and ensure that proper ventilation is provided for stabilizer. Make sure that there is no loose connection and proper earthing is done. Please refer the below table for display indications.

| CONDITION | DIGITAL DISPLAY INDICATION | OUTPUT VOLTAGE |
|-------------------------|---|----------------|
| Input and Output Normal | Shows Input/Output Voltage Alternatively | Available |

Switch off stabilizer when AC is not in use.
